

# ENGINEERED TO SURVIVE THE MOST DEMANDING CONDITIONS.

Hüper Optik's Advanced Ceramic Solar Control Window Film provides the toughest shielding against the most extreme heat and glare.

# TOUGH FOR LIFE

## DURABLE & EXTRAORDINARY PERFORMANCE

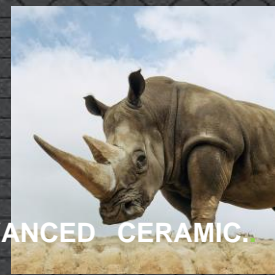

Using nano-ceramic technology developed in joint-study with the Fraunhofer-Gesellschaft of Germany, Hüper Optik Ceramic Series offers a range of high performing solar control films with scratch resistance hard coat and superb durability while maintaining high total solar energy rejection (TSER).

\*TSER indicated for highest performing film in package. TSER for entire package around the full vehicle will be slightly less.

LIFE'S NO SWEAT  
WHEN YOU'RE  
TOUGH AS  
HÜPER

X3 TITANIUM NITRATE ADVANCED CERAMIC.  
UNBREAKABLE.

## TESTED TO PERFORM

The World's 1<sup>st</sup> and only Patented Nano-Ceramic film

Hüper Optik Ceramic Series film is our top of the range product. This film is created with dual layers of Titanium Nitride (TIN) and was awarded a U.S. patent for its innovative multi-layer film construction.

The coating of TIN makes the film corrosion resistant compared to metal films and more stable than dyed films that fade easily.

Hüper Optik Ceramic series film not only provides high heat rejection benefits but also minimizes interference with GPS systems and cellular phones.

## FEATURES & BENEFITS

4X less reflectance (VLR) than metal film  
**\*Reduces glare\***

13° cooler compared with no film  
**\*Cooler interior\***

25 x more durable than conventional film  
**\*Tough\***

3X more infra-red rejection (IRR) than dyed film  
**\*Saves energy\***

\*\*Hüper Optik window film provides >99% UVR\*\*
